Bridgelux® Vesta® Series Tunable White Gen 2 18mm Array
Product Data Sheet DS353
Vesta® Series Tunable White Array products deliver adaptable light in a solid state lighting package. Vesta Series products tap into the powerful mediums of light and color to influence experience, well-being, and human emotion. They allow designers to mimic daylight to increase productivity and well-being, retailers to influence shopper behavior and fixture manufacturers to simulate the familiar glow and dimming of incandescent lamps. This high flux density light source is designed to support a wide range of high quality directional luminaires and replacement lamps for commercial and residential applications.

Lighting system designs incorporating these LED arrays deliver comparable performance to 150 Watt incandescent-based luminaires, while increasing system level efficacy and prolonging service life. Typical luminaire and lamp types appropriate for this family include replacement lamps, down lights, wall packs and accent, spot and track lights.

### Features

- Tuning range from 2700K-5000K and 2700K-6500K
- Efficacy of 126 lm/W typical
- Uniform, high quality illumination
- Minimum 90 CRI option
- More energy efficient than incandescent, halogen and fluorescent lamps
- Industry standardized dimensions
- Flux packages from 3100 to 3700 lumens typical
- 3 SDCM bin options for both warm white (2700K) and cool white (5000K and 6500K)

### Benefits

- Superior color mixing enabled by phosphor dispensed technology
- Compact system design
- High quality, true color reproduction
- Reliable operation facilitated by high conductivity substrates
- Enhanced optical control
- Uniform, consistent white light

</table>
Bridgelux arrays are fully engineered devices that provide consistent thermal and optical performance on an engineered mechanical platform. The arrays incorporate several features to simplify design integration and assembly. Please visit www.bridgelux.com for more information on the Vesta Series family of products.
The following product configurations are available:

**Notes for Table 1:**
1. Nominal CCT as defined by ANSI C78.377-2011.
2. CRI Values are minimums. Minimum R<sub>9</sub> value for 90 CRI products is 50. Bridgelux maintains a ±3 tolerance on all R<sub>9</sub> values.
3. Products tested under pulsed condition (10ms pulse width) at nominal test current where T<sub>j</sub> (junction temperature) - T<sub>c</sub> (case temperature) - 25°C.
4. Typical performance values are provided as a reference only and are not a guarantee of performance.
5. Bridgelux maintains a ±7% tolerance on flux measurements.
6. Typical stabilized DC performance values are provided as reference only and are not a guarantee of performance.
7. Typical performance is estimated based on operation under DC (direct current) with LED array mounted onto a heat sink with thermal interface material and the case temperature maintained at 85°C. Based on Bridgelux test setup, values may vary depending on the thermal design of the luminaire and/or the exposed environment to which the product is subjected.
8. Minimum flux values at the nominal test current are guaranteed by 100% test.
# Electrical Characteristics

## Table 2: Electrical Characteristics

<table>
<thead>
<tr>
<th>Part Number</th>
<th>CCT (K)</th>
<th>Nominal Drive Current (mA)</th>
<th>Forward Voltage Pulsed, $T_c = 25^\circ C$ (V) $^1, 2, 3, 7$</th>
<th>Typical Temperature Coefficient of Forward Voltage $^4$ $\Delta V_f / \Delta T_c$ (mV/$^\circ C$)</th>
<th>Typical Thermal Resistance Junction to Case $^5$ $R_{j-c}$ ($^\circ C$/W)</th>
<th>Driver Selection Voltages$^6$ (V)</th>
</tr>
</thead>
<tbody>
<tr>
<td>BXRV-TR-27xxG-40A0-A-2x</td>
<td>2700</td>
<td>900</td>
<td>Minimum: 32.8, Typical: 34.8, Maximum: 36.9, $\Delta V_f / \Delta T_c = -11.5$</td>
<td>0.35</td>
<td>31.9</td>
<td>37.7</td>
</tr>
<tr>
<td></td>
<td>5000/6500</td>
<td>900</td>
<td>Minimum: 33.2, Typical: 35.3, Maximum: 37.5, $\Delta V_f / \Delta T_c = -11.6$</td>
<td></td>
<td>32.3</td>
<td>38.2</td>
</tr>
</tbody>
</table>

**Notes for Table 2:**

1. Parts are tested in pulsed conditions, $T_c = 25^\circ C$. Pulse width is 10ms.
2. Voltage minimum and maximum are provided for reference only and are not a guarantee of performance.
3. Bridgelux maintains a tester tolerance of ± 0.10V on forward voltage measurements.
4. Typical temperature coefficient of forward voltage tolerance is ± 0.1mV for nominal current.
5. Thermal resistance value was calculated using total electrical input power; optical power was not subtracted from input power. The thermal interface material used during testing is not included in the thermal resistance value.
6. $V_{f, \text{min hot}}$ and $V_{f, \text{max cold}}$ values are provided as reference only and are not guaranteed by test. These values are provided to aid in driver design and selection over the operating range of the product.
7. This product has been designed and manufactured per IEC 62031:2014. This product has passed dielectric withstand voltage testing at 500V. The working voltage designated for the insulation is 45V DC. The maximum allowable voltage across the array must be determined in the end product application.
# Absolute Maximum Ratings

Table 3: Maximum Ratings

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Maximum Rating</th>

</thead>
<tbody>
<tr>
<td>LED Junction Temperature (T&lt;sub&gt;j&lt;/sub&gt;)</td>
<td>125°C</td>
</tr>
<tr>
<td>Storage Temperature</td>
<td>-40°C to +105°C</td>
</tr>
<tr>
<td>Operating Case Temperature&lt;sup&gt;1&lt;/sup&gt; (T&lt;sub&gt;c&lt;/sub&gt;)</td>
<td>105°C</td>
</tr>
<tr>
<td>Soldering Temperature&lt;sup&gt;2&lt;/sup&gt;</td>
<td>300°C or lower for a maximum of 6 seconds</td>
</tr>
<tr>
<td>Maximum Drive Current&lt;sup&gt;3&lt;/sup&gt;</td>
<td>1400mA</td>
</tr>
<tr>
<td>Maximum Peak Pulsed Drive Current&lt;sup&gt;3,4&lt;/sup&gt;</td>
<td>1680mA for Warm White 2700K, 1440mA for Cool White 5000K/6500K</td>
</tr>
<tr>
<td>Maximum Total Power</td>
<td>48.9W</td>
</tr>
</tbody>
</table>

Notes for Table 3:
1. For IEC 62717 requirement, please contact Bridgelux Sales Support.
2. See Bridgelux Application Note AN101 for more information.
3. Maximum Drive Current is maximum combined drive currents between both 2700K and 6500K channels. For example, if 700mA is applied to the 2700K channel, no current may be applied to the 6500K channel of the array. If 350mA is applied to the 2700K channel, then a maximum of 350mA can be applied to the 6500K channel.
4. Bridgelux recommends a maximum duty cycle of 10% and pulse width of 20ms when operating LED arrays at the maximum peak pulsed current specified. Maximum peak pulsed currents indicate values where the LED array can be driven without catastrophic failures.

Typical Radiation Pattern

Figure 10: Typical Spatial Radiation Pattern

Notes for Figure 10:
1. Typical viewing angle is 130°.
2. The viewing angle is defined as the off axis angle from the centerline where Iv is ½ of the peak value.

Figure 11: Typical Polar Radiation Pattern
Typical Color Spectrum

Figure 12: Typical Color Spectrum

Note for Figure 12:
1. Color spectra measured at nominal current for $T_j = T_c = 25^\circ C$.

Figure 13: Typical Color Spectrum

Note for Figure 13:
1. Color spectra measured at nominal current for $T_j = T_c = 25^\circ C$. 
**Notes for Figure 14:**

1. Solder pads are labeled "+" to denote positive polarity and "-" to denote negative polarity. Solder pads have a gold surface finish.
2. Drawings are not to scale.
3. Drawing dimensions are in millimeters.
4. Unless otherwise specified, tolerances are ± 0.10mm.
5. The optical center of the LED array is nominally defined by the mechanical center of the array.
6. Bridgelux maintains a flatness of 0.1 mm across the mounting surface of the array. Refer to Application Notes for product handling, mounting and heat sink recommendations.
Color Binning Information

</table>

Note: Center Point (x,y) are the center points of the respective ANSI bins. Products are binned at Tc=85°C
Packaging and Labeling

Figure 16: Vesta Series Tunable White 18mm Packaging and Labeling

Notes for Figure 16:
1. Each tube holds 20 Vesta Series Tunable White 18mm arrays.
2. Four tubes are sealed in an anti-static bag. Up to five such bags are placed in a box and shipped. Depending on quantities ordered, a bigger shipping box, containing four boxes will be used to ship products.
3. Each bag and box is to be labeled as shown above.
4. Dimensions for each tube are 510.0 mm (L) x 26.3 mm (W) x 9.5 mm (H). Dimensions for the anti-static bag are 100.0 mm (W) x 625.0 mm (L) x 0.1 mm (T) and that of the inner box are 58.7 mm (L) x 13.3 mm (W) x 7.9 mm (H).
Design Resources

Application Notes
Vesta Series Tunable White arrays are intended for use in dry, indoor applications. Bridgelux has developed a comprehensive set of application notes and design resources to assist customers in successfully designing with the Vesta Series product family of LED array products. For a list of resources under development, visit www.bridgelux.com.

Optical Source Models
Optical source models and ray set files are available for all Bridgelux products. For a list of available formats, visit www.bridgelux.com.

3D CAD Models
Three dimensional CAD models depicting the product outline of all Bridgelux Vesta Series LED arrays are available in both IGS and STEP formats. Please contact your Bridgelux sales representative for assistance.

LM80
Please contact your Bridgelux sales representative for more information.

Precautions

CAUTION: CHEMICAL EXPOSURE HAZARD
Exposure to some chemicals commonly used in luminaire manufacturing and assembly can cause damage to the LED array. Please consult Bridgelux Application Note for additional information.

CAUTION: EYE SAFETY
Eye safety classification for the use of Bridgelux Vesta Series is in accordance with IEC/TR62778 specification ‘IEC 62471 for the assessment of blue light hazard to light source and luminaires’. Vesta Series Tunable White arrays are classified as Risk Group 1 when operated at or below the maximum drive current. Please use appropriate precautions. It is important that employees working with LEDs are trained to use them safely.

CAUTION: RISK OF BURN
Do not touch the Vesta Series LED array during operation. Allow the array to cool for a sufficient period of time before handling. The Vesta Series LED array may reach elevated temperatures such that could burn skin when touched.

Disclaimers

STANDARD TEST CONDITIONS
Unless otherwise stated, array testing is performed at the nominal drive current.

MINOR PRODUCT CHANGE POLICY
The rigorous qualification testing on products offered by Bridgelux provides performance assurance. Slight cosmetic changes that do not affect form, fit, or function may occur as Bridgelux continues product optimization.
At Bridgelux, we help companies, industries and people experience the power and possibility of light. Since 2002, we’ve designed LED solutions that are high performing, energy efficient, cost effective and easy to integrate. Our focus is on light’s impact on human behavior, delivering products that create better environments, experiences and returns—both experiential and financial. And our patented technology drives new platforms for commercial and industrial luminaires.
